

ESPRIT 2013 System and Component Requirements

Welcome to ESPRIT 2013, the latest release of DP Technology's CAD/CAM solution ESPRIT. Computer systems that meet the minimum supported hardware requirements will be able to run ESPRIT 2013. Any hardware requirement that exceeds the minimum will improve the performance and user experience of ESPRIT 2013.

The minimum requirements are determined by a wide array of factors considering what the average customer needs to ensure an acceptable performance experience for the myriad of parts that are programmed in ESPRIT. The acceptable performance experience must be maintained from programming punch and die work in Wire EDM to programming 5-axis aerospace parts on a multi-tasking machine.

ESPRIT 2013 Minimum Hardware Requirements	
Processor	2 GHz
System Memory	2 GB
Resolution	SVGA (1024x768)
Graphics Memory	Dedicated 512 MB
HDD	40 GB
HDD Free Space	20 GB
Optical Drive	DVD-ROM
Ports	USB (required for ESPRIT security system)

ESPRIT requires certain operating system components to be installed to function properly. These are prerequisites of installing ESPRIT. These components must be installed prior to installing ESPRIT. Systems failing to meet these criteria will cause the ESPRIT installation to fail.

Required Operating System Components for ESPRIT 2013
Windows® Vista or Windows 7™
Microsoft® Internet Explorer® version 6.0 or greater
Microsoft® .NET Framework 4.0
Microsoft® Windows® Installer version 3.1

DP Technology's Security System Server System and Component Requirements

Welcome to the Security System Server, the latest security product used in DP Technology's CAD/CAM solutions for floating licenses. Computer systems that meet the minimum supported hardware requirements will be able to run the Security System Server. Any hardware requirement that exceeds the minimum will improve the performance and user experience of the Security System Server and the programs that access it.

DP Security System Server Minimum Hardware Requirements	
Processor	1 GHz 32-bit (x86)
System Memory	1 GB
Resolution	SVGA (1024x768)
Graphics Memory	128 MB
HDD	40 GB
HDD Free Space	5 GB
Optical Drive	DVD-ROM
Ports	USB (required for ESPRIT security system)

The Security System Server requires certain operating system components to be installed to function properly. These are prerequisites of installing the Security System Server. These components must be installed prior to installing the Security System Server. Systems failing to meet these criteria will cause the installation to fail.

DP Security System Server Minimum Hardware Requirements
Windows® Vista or Windows 7™
Microsoft® Internet Explorer® version 6.0 or greater
Microsoft® .NET Framework 2.0
Microsoft® Windows® Installer version 3.1
Safenet Sentinel Drivers Version 7.4.2

Note on Windows 8 (17-Dec-2012)

DP Technology does not support Windows 8 operating system for ESPRIT.

Microsoft SQL Server 2005 (the release version and service packs) and earlier versions of SQL Server are not supported on Windows Server 2012 or Windows 8. You will receive a warning in the Action Center if Windows 8 detects an instance of SQL Server 2005.

SQL Server 2005 is a fundamental functionality required to run ESPRIT 2013. Until ESPRIT is updated to a newer version of SQL Server Windows 8 will not be supported
