

Introduction to PTC Windchill PDM for non-CAD Users

Overview

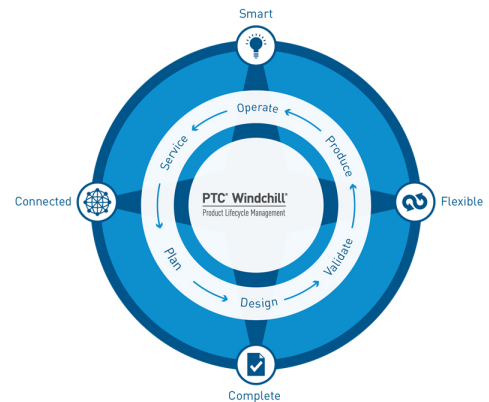

Course Length

8 Hours

In this course, you will learn how to complete basic functions to navigate and view information within Windchill PDM. You will also learn how to access and navigate the Windchill PDM environment, view product information, use Windchill PDM's visualization tools, manage assigned tasks, and perform basic work management functions. In addition, you will learn how to use product information to make important business decisions. After completing the course, you will be able to complete basic Windchill PDM tasks and activities, as well as have a better understanding of how to use the Windchill PDM system.

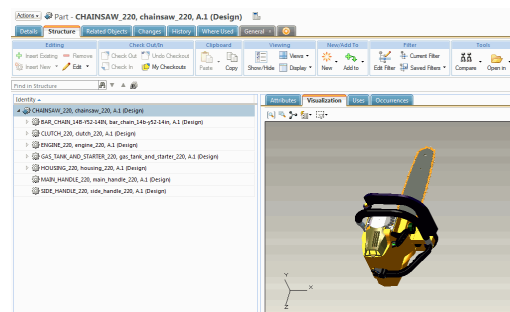

At the end of each module, you will complete a set of review questions to reinforce critical topics from that module. At the end of the course, you will complete a course assessment in Pro/FICIENCY intended to evaluate your understanding of the course as a whole.

This course has been developed using Windchill / Creo Parametric.

Course Objectives

- Understand the Windchill PDM environment and terminology
- Locate product information
- View product information
- Understand visualization concepts and terminology
- Use Creo View Lite to view product information
- Use Windchill PDM tools to manage your work
- Participate in Windchill PDM processes

Prerequisites

- Basic browser and Web navigation skills

Audience

- This course is intended for users who need to access the Windchill PDM system to view information, perform system tasks, or use product information when making business decisions. People in related roles will also benefit from taking this course.
